**Sriven** is a global engineering firm dedicated to solving the complex challenges of the modern enterprise.

Established in 2011 in the United Kingdom, we are built on a technical foundation spanning over decades, evolving alongside the industry from legacy infrastructure to the bleeding edge of AI.

**We are** not just service providers; we are technologists at our core. Our DNA is rooted in the "Problem Space", we thrive where challenges are difficult and the stakes are high. Backed by a robust R&D and Innovation engine, we help organizations navigate technological shifts with the wisdom of experience and the agility of a startup.

Operating a seamless Follow the Sun model across five strategic hubs, we bring global scale, local precision, and total accountability to every engagement.

# OUR FIVE PILLARS

# 1

**Unified Data Estate**  
Transforming fragmented data silos into a unified, governed fabric that turns raw input into trusted business intelligence.

# 2

**Enterprise Integration**  
Orchestrating the seamless flow of information across your entire ecosystem through robust, API-led connectivity.

# 4

**Zero Trust Security**  
Safeguarding business continuity and brand reputation with an adaptive security posture that proactively detects, neutralizes, and remediates modern threats.

# 3

**Application Modernization**  
Refactoring mission-critical legacy systems into agile, cloud-native microservices to remove technical debt without operational disruption.

# 5

**AI-Driven Automation**  
Leveraging our R&D innovation engine to deploy pragmatic Agentic AI workflows that move beyond passive insights to autonomous execution and measurable efficiency.

## CERTIFIED BY

"A holistic suite of capabilities designed to resolve technical complexity and unlock new business value."

Striven -

# SUCCESS STORIES MAJOR

## **Transforming Warehouse Operations (CAT & DHL)**

Built an AI/ML-powered robotics warehouse integrated with SAP ERP, accelerating picking, packing, shipping and delivering real-time operational insights.

## **AI-Powered Digital Manuals (Caterpillar - Perkins)**

Digitized 200+ page manuals and deployed an AI/ML-powered DocChatGPT interface for instant access to repair and parts information, reducing downtime and improving supply chain efficiency.

## **Automating Referral Processing with MuleSoft IDP (Clinical Partners)**

Clinical Partners transformed a manual, fragmented referral process into a streamlined automated workflow using the MuleSoft IDP Connector, enabling faster Salesforce lead creation and improved efficiency.

## **Aerospace Manufacturing (ZeroAvia)**

Assessed and documented ERP customizations and automation supporting manufacturing to identify performance, upgrade, and compliance risks, delivering targeted optimization recommendations.

## **E-Commerce & SAP Integration (Car & General)**

Automated manual ordering by building an e-commerce platform integrated with SAP, improving order tracking, forecasting, payments, and executive decision-making.

## **Banking Industry (HSBC)**

Implemented real-time data replication across multiple business units for trade applications using a next-generation technology stack, enabling seamless cross-business operations, data consistency, and faster transaction processing.
